Post-Operative Work Restriction Guidelines for Surgical Fixation of Lis Franc Fracture*

EXPECTED POST OPERATIVE RECOVERY TIMELINE	POST OPERATIVE WORK RESTRICTIONS
Day of Surgery through week 2 Post-op	Off Work
Post-op week 2 through week 6	Seated Work
Post-op week 6 through week 12	Seated Work (possible increased use, depending on x-ray)
Post-op week 12 through week 16	Return to regular duties (possible modified duties depending on healing)
Post-op months 9 through month 12	MMI

Restrictions may vary in the event of post-operative complications or unanticipated changes in your condition.

- Your employer will determine if you are able to return to work with the restrictions given by your physician.
- Restrictions are to be followed at work and at home.
- You may drive three days after your surgery if you are not taking narcotic medication and feel safe to drive. If you continue to feel unsafe to drive, it is your responsibility to arrange transportation to work.
 - If you had surgery on your right foot, you can not drive for 6-8 weeks
 - If you had surgery on your left foot, you can not drive a stick shift vehicle for 6-8 weeks
- If you have questions specific to your work restrictions, please call OSMC at (574) 264-0791.
- Questions regarding use of medication at work should be directed to your employer's human resources department or supervisor.
- Questions regarding your worker's compensation checks should be directed to your claims adjuster.
