

# WORK INJURY CARE CENTER

## **Post-Operative Work Restriction Guideline for Ligament Reconstruction Tendon Imposition (LRTI)\***

EXPECTED POST OPERATIVE RECOVERY TIMELINE	POST OPERATIVE WORK RESTRICTIONS
Day of Surgery through 1 week post-op	Off Work
Post-op week 1 through week 4	Return to work with no use of affected extremity
Post-op week 4 through week 10	Increase use of affected extremity
Post-op week 10 through week 12	Return to regular duties
Post-op week 12	MMI, possible PPI

**Restrictions may vary in the event of post-operative complications or unanticipated changes in your condition.**

- Your employer will determine if you are able to return to work with the restrictions given by your physician.
- Restrictions are to be followed at work and at home.
- You may drive three days after your surgery if you are not taking narcotic medication and feel safe to drive. If you continue to feel unsafe to drive, it is your responsibility to arrange transportation to work.
- If you have questions specific to your work restrictions, please call OSMC at (574) 264-0791.
- Questions regarding use of medication at work should be directed to your employer's human resources department or supervisor.
- Questions regarding your worker's compensation checks should be directed to your claims adjuster.
